

We were the DJs (Evelyn & Denny) at the Boots 'n' Buckles annual Halloween Dance last night (10/25/13). There were 64 dancers! Dances with the top 5 most request initials next to them are listed first. Keep in mind, there were only 1 or 2 request initials separating these. The most important part is that the floor almost always has a lot more dancers than initials on the request list, including older dances as well as long-time favorites. Lots of folks don't enter request initials but get on the floor anyway. (For those who like to count initials placed on the request list of dances, there are times when one person's initials take up more than one space, and times when initials are placed on the request list very late in the evening--just a couple tidbits). Thanks to all for coming. It was a great night.
